Notice Regarding a Security Incident Involving an External Backup Service

“HYDIS TECHNOLOGY” uses the cloud backup services provided by “DOUZONE BIZON” to back up certain company information, including employee-related records.

“DOUZONE BIZON” recently identified a security incident involving a vulnerability in its backup system environment. According to “DOUZONE BIZON”, there are indications that some encrypted data stored in the affected environment may have been externally extracted. “DOUZONE BIZON” is currently investigating the circumstances of the incident and the scope of any potential impact.

The backup materials maintained by “HYDIS TECHNOLOGY” through this service contain personal information relating to current and former employees. However, it has not yet been confirmed whether “HYDIS TECHNOLOGY”'s backup data was stored in the systems affected by this incident or whether it was included in any data that may have been externally extracted. Accordingly, there is currently no confirmation that “HYDIS TECHNOLOGY” employees' personal information has been compromised.

According to “DOUZONE BIZON”, the backup data was encrypted, and there is currently no indication that the encryption keys were exposed. “DOUZONE BIZON” has also informed “HYDIS TECHNOLOGY” that it has reported the incident to the Korea Internet & Security Agency.

“HYDIS TECHNOLOGY” takes this matter seriously and is monitoring the progress of “DOUZONE BIZON”'s investigation. If the investigation confirms that “HYDIS TECHNOLOGY”'s personal information was affected, or if any further action is required, “HYDIS TECHNOLOGY” will take appropriate measures in accordance with applicable laws and provide further information as necessary.

We appreciate your understanding and cooperation.
